

**Dimitris Homatidis, Circular Economy Expert of Green Fund**

Environmental Engineer, a graduate of Cardiff University in Wales, with postgraduate degrees in Applied Environmental Sciences and Information Systems. Many years of work experience in the field of non-governmental environmental organizations with the main object of sustainable solid waste management. He also has significant experience as an adult educator as well as in the field of environmental education. Evaluator of proposals of European programs (LIFE & Erasmus+). In recent years he has been working at the Green Fund in LIFE projects as an expert on environment and resource efficiency in the LIFE Capacity Building "Greek LIFE Task Force" and most recently as a Circular Economy expert in the Integrated LIFE project "Implementation of circular economy in Greece" (CEI-Greece). He collaborates in the framework of the implementation of European programs with NGOs and research institutes. In 2024, his cooperation with the Centre for Research and Technology Hellas began in the framework of the implementation of the European projects Interreg Euro-MED "Greensmartmed" and "Circlemed".
